Personal checks for shell bill (licenses will be included on shell bill)

The weather this time of year is warm but pleasant. The temperature will range from lows in the 70's and highs in the 90's. We normally don't get rain this time of year, but it is a possibility.

This is a suggestive list and a guideline. You may want to bring more or less. Laundry can be done while you are there if you need this service.

**** You will also need to take your guns to your US Customs office and get the US Customs Form 4457. This is very important to get your guns back into the US. Another option is to get a notarized statement saying the guns were yours before you left the country, but the 4457 Form is much better to have.**
